Manitoba Bureau of Statistics

October 9, 1987

SUBJECT: MANITOBA QUARTERLY ECONOMIC ACCOUNTS, HISTORICAL: 1971 - 1986

I. INTRODUCTION:

The Manitoba Bureau of Statistics (MBS) has developed set of Quarterly Economic Income Accounts for the province. Included are quarterly estimates of Gross Domestic Product at Market Prices, Personal Income, Personal Disposable Income, and Gross Domestic Product at Factor Cost for nineteen industry groups. These estimates are available in current dollars in either raw or seasonally adjusted form.

The MBS Quarterly Economic Account series were developed to provide the Manitoba Government with more current information on the province's economic performance. Seasonal adjustment of quarterly data allows current quarter to previous quarter comparisons (i.e. 2nd quarter 1986 to 1st quarter 1986). In addition trends can be identified much earlier than is possible by using raw (unadjusted) or annual data.

The addition of data for Personal Income and Personal Disposable Income in constant 1981 dollars allows comparisons of purchasing power (the effects of inflation on consumer prices are removed indicating the amount of goods and services which can be purchased for a given level of income) to be made for any quarters.

This report gives historical data from the 1st quarter of 1971 to the 4th quarter of 1986. The data from the 1st quarter of 1982 to the 4th quarter of 1986 is subject to revisions. Users who want to receive revisions and current updates should ensure that they have subscribed to the MBS "Quarterly Economic Performance" Report (MBS information product 4(C): cost $100 per year).

If there are any questions or comments concerning this report please contact Roy Ellis at MBS at (204) 945-2994.
